DID YOU KNOW?

Hearing loss is the third most common chronic ailment among older adults. The reality for many patients is that hearing loss is permanent and when left untreated quality of life begins to suffer. The longer a hearing loss goes untreated, treatment options become more limited. Addressing and treating hearing loss restores self confidence, security and independence. Not only does it improve your own quality of life, it also provides peace of mind for you and your family.

## WHAT IS AN AUDIOLOGIST?

Audiologists are highly trained healthcare professionals that hold a Master's or Doctoral degree in Audiology from an accredited university. They are the only professionals trained and licensed to specifically identify, evaluate, diagnose and treat non-medical hearing and balance disorders for all ages.

By virtue of their graduate education, professional certification and licensure, Audiologists are the most qualified professionals to perform hearing tests. Audiologists conduct a wide variety of tests to determine the exact nature of an individual's hearing problem and present a range of treatment options for these patients.

## ADULT & PEDIATRIC DIAGNOSTIC SERVICES

- )) Newborn, pediatric and adult hearing evaluations, including full audiometric and middle ear immittance testing
- )) Auditory Brainstem Response (ABR) testing for the evaluation of newborn and pediatric patients and the evaluation of retrocochlear pathologies
- )) Otoacoustic emissions to assess peripheral auditory system function
- )) Videonystagmography (VNG) for dizziness and balance assessment

## HOW'S YOUR HEARING?

- Do you hear sounds but have trouble understanding words?
- Do you struggle to follow conversation in a noisy environment, such as a restaurant?
- Do others complain that the volume is too loud when you are watching television or listening to the radio?
- Do people seem to mumble?
- Do you find yourself asking people to repeat themselves?

**IF ANY OF THESE APPLY TO YOUR HEARING SITUATION, TAKE THE FIRST STEP AND HAVE YOUR HEARING EVALUATED BY AN AUDIOLOGIST**

## REHABILITATIVE AUDIOLOGY SERVICES

*Provided by  
Hearing & Balance Specialists of Oneida*

Today's hearing aids are digital micro-computers that can automatically adjust to ensure the best possible listening experience. Modern technology means that hearing aids are more discreet, more comfortable and more effective than ever before. We are pleased to offer:

- )) Complete selection of the most advanced hearing aid technologies for adult and pediatric patients
- )) All levels of hearing aid technology to meet life style and economic needs
- )) 45-day trial period for all hearing aid purchases
- )) Comprehensive repair and replacement warranties included in hearing aid purchase
- )) Individualized follow-up program for hearing aid cleanings and checks
- )) Hearing aid maintenance and repair, with a full-service on-site laboratory for minor repairs
- )) Custom hearing and ear protection, including noise protection and swim plugs
